

Incorporated association profile “registered association: women for women in Stolberg”

(„Frauen für Frauen in Stolberg e.V.“)

CATEGORY “about us”

We are women and girls from many different countries, with many different languages and cultures, but we have something in common: We all live here in Stolberg and our common language is German. From a social project in the district “Alte Velau”, the foundation of a community of interest named “women and girls Velau” was developed in 2011. The women started to improve their district, by connecting female migrants with old-established citizens. By building and opening the “KUGEL”, there was now a place for regular encountering for women of this vicinity. Since then an association which aims have expanded, was established out of this idea, because now a new issue was developed in Stolberg: the influx of migrants and their families to Stolberg.
